

Low-Code infographic

Growth of low code development after 2020

Gartner already predicted in 2022 that the global market for low code development technologies would grow by 20% in 2023

Business technologists, hyperautomation and composability will drive the adoption of low code technology through 2026, Gartner predicts.

<p>10x</p> <p>Faster than traditional development</p>	<p>68%</p> <p>Of companies already rely on low code software</p>	<p>\$26.9 miljard</p> <p>Value of the global low code development market in 2023</p>
--	---	---

No code/low code solutions take about 10% of the time that traditional programming takes.

- Gartner Inc

Less development time

The use of low-code and no-code technologies will almost triple by 2025.

- Gartner Inc

By 2030, the market size of low code development platforms is expected to reach 148.5 billion dollar, with a CAGR of 27.8%, according to Straits Research.

The global market size for low-code development platforms was worth \$16.3 billion in 2021.

This study estimates that it will reach a projected value of \$148.5 billion by 2030, with a Compound Annual Growth Rate of 27.8% during the period 2022-2030.
